

**TBAK 30 3 / 1 / A3 - M / LT - ...**

Pompetravaini Construction

Multistage self-priming centrifugal pumps

**Construction type**

**AK** = execution with horizontal suction flange, PN40 vertical discharge flange for very low NPSH values and magnetic coupling

Nominal pump size

Stages number

**Construction project number**

**1** = standard support  
**2** = standard support (for TBAK 650 only)

**Construction materials**

**A3** = AISI 316 stainless steel construction  
**GH** = execution with casings of ductile iron, elements and diffuser of cast iron, AISI 420 shaft, brass impellers  
**RA** = execution as GH but with AISI 316 stainless steel impellers and shaft  
**GP** = execution as GH but with sealing bushing on elements

**Close coupled construction type**

**M** = Close-coupled construction with lantern (on request)

**Special constructions**

**LT** = execution for -45°C storage temperature  
**F** = execution with diffuser flushing from pump discharge  
**Z** = special features on request
